

See Brighter, See Faster, See More

CrestOptics Spinning Disk Confocal Series

Featuring strong optical design and flexibility, CrestOptics spinning-disk confocal solutions can be combined with Evident's range of microscopes and optics to create a tailor-made live-cell imaging system that brings power, precision, and possibilities to your research.

X-Light V3

Cutting-Edge, Flexible, and Powerful

Powered with 89 North LDI, and Chroma filters, the X-Light V3 leverages CrestOptics' cutting-edge optical design and engineering solutions for a flexible and powerful spinning-disk confocal system. Each feature is designed to optimize data from each individual sample, from fast cell dynamics on live specimens to optical sectioning of clarified tissues. The X-Light V3 works fast to provide qualitative and quantitative imaging of large samples.

CICERO

User-Friendly and Compact

CICERO is a complete widefield and spinning-disk confocal solution that can be integrated into a range of imaging setups, transforming it into a user-friendly and reliable confocal system that can address both entry-level and challenging applications.
